

- We keep having to drag the numbered marks about to get them in the wind.
- They can get left out of place for the next week's racing
- We have a lot of buoys.
- So:
  - The number of buoys has been reduced.
    - We now have 8 as opposed to 10 outer marks, 3 lettered marks, the mooring buoy and flag 'W'.
  - The numbered buoys should not be moved unless necessary.
    - You can still use the numbered buoys as windward marks if sensible and they are in wind.
  - A,B and C are now designated 'moveable' marks. Use these as windward marks and place wherever on the lake you need them.
    - These now live out of the water in buckets by the sail shed when not being used.
    - The buckets stop you filling the Jaffas up with mud!
  - On the course board by the hut you can now move A,B and C and place them as needed to reflect what you have done on the lake.
  - Lay 'W' for start/finish line as required.
  - We have a new mooring buoy, with a lovely long hoop on the top to catch the unwary.
    - Use this as a mark if required.
- Make sure the sailors know the marks have changed!

**5** Red - Odd

**2** White - Even

**B** Yellow - Letter - Moveable Windward Marks – stored out of water by the hut

**CB** Committee Boat Mooring buoy – Yellow with staff - fixed

## An Example - SW Wind:

- Set A and B to use as windward marks.
- Use Boat-W as start/finish.
- You could also use a lettered mark as a gybe mark if no numbered mark is suitable. We have used C here.
- Ideally use the lettered marks in alphabetical order.
